PERFORMANCE (Cartridge Only)

DESCRIPTION

A screw-in, cartridge-style, direct-acting, spool-type, hydraulic sequence valve with external pilot and internal spring chamber drain.

OPERATION

In its steady state, the **PS08-32** blocks flow from ③ to ②. On attainment of a pre-determined pressure at ①, the valve shifts to open ③ to ②.

Back pressure at ② will have a direct (1:1) effect on the valve's setting because the spring chamber is vented out ②.

FEATURES

- Adjustments cannot be backed out of the valve.
- Adjustments prohibit springs from going solid.
- Optional spring ranges to 165.5 bar (2400 psi).
- Hardened spool and cage for long life.
- · Compact size.
